- Understand why there is no project manager and no agile product manager

3.Product Vision

- Understand the importance of having the product vision as an overarching goal galvanizing the entire Scrum team
- Understand the desirable qualities of the vision and how it can be shaped
- Understand the importance of carrying out just enough prep work
- Understand the relationship between vision and product roadmap

4.Estimating

- Understand the different estimation levels in Scrum
- Understand that the accuracy of an estimate is more important than the precision of the estimate
- Understand that estimates of size and duration can be done separately
- Understand the impact of pressuring team members to provide low estimates

- Understand the difference between estimating and committing

5.Product Backlog

- Understand what the product backlog is, and what it is not
- Understand product backlog grooming

6.Prioritizing

- Understand the importance and benefits of prioritizing the product backlog
- Understand the implications of saying everything is mandatory
- Understand who should have input into prioritization decisions
- Understand that proper prioritization of a product backlog is based on multiple factors
- Understand and know how to apply formal approaches to prioritizing (i.e. beyond just 'gut feel' or intuition)
- Understand how much latitude to give a team in adjusting the sequence of work

7.Release Management

- Understand the goals and how-tos of release planning
- Understand that planning is adaptive, iterative and collaborative
- Understand why quality is frozen and the concept of technical debt
- Understand why software should be released early and frequently
- Understand and measure velocity
- Understand release burndown charts
- Understand how a release plan can help predict the future

8. Sprints

- Understand the product owner's role in Scrum meetings, and how the Product Owner and Team collaborate
- Understand why sprints are timeboxed and protected
- Understand the concept of sustainable pace
- Understand team commitment

Prerequisites

There are no prerequisites to take the Certified Scrum Product Owner® (CSPO®) training. However, having a good command over the Scrum basics will prove effective in understanding the Product Owner's role at an enterprise level. If you are a Certified Scrum Master® (CSM®), taking up the CSPO training should be your next career move.
